

SUWANNEE RIVER
WATER MANAGEMENT DISTRICT

USACE and District Joint Application Process Changes

The U.S. Army Corps of Engineers (Corps) will no longer be participating in the Joint Application process beginning October 1, 2017.

If your project requires a Corps permit, you must apply separately to the Corps using the appropriate federal application form for activities under federal jurisdiction.

Please see the Corps' [Jacksonville District Regulatory Sourcebook](#) for more information about federal permitting, which contains a link to the Corps permit application form [ENG 4345](#).

The Corps will not receive any new joint applications or process applications still deemed incomplete beginning October 1, 2017.
